(300)

Time Allowed: 3 Hours**Max Marks: 50**

Note: The candidates will have to attempt five questions in all selecting one from each section and the fifth question from any of the four sections. Each question will carry 10 marks.

Section – A

1. Describe the various kinds of reading.
2. What is PSQ5R model of reading?

Section – B

3. Read the following passage and answer the questions in multiple choice form. Mark (✓) in front of the right answer:

Trees give shade for the benefits of others, and while they themselves stand in the sun and endure the scorching heat, they produce the fruit by which others profit. The character of good men is like that of trees. What is the use of this perishable body if no use is made of it for the benefit of mankind? Sandalwood, the more it is rubbed, the more scent does it yield. Sugarcane, the more it is peeled and cut up into pieces, the more juice does it produce. The men who are noble at heart do not lose their qualities even in losing their life. What matters it whether men praise them or not. What difference does it make whether they die at this moment or whether their lives are prolonged? Happen

what may, those who tread in the right path will not set foot in any other. Life itself is unprofitable to a man who does not live for others. To live for the mere sake of living one's life is to live the life of dogs and crows. Those who lay down their lives for the sake of others will assuredly dwell forever in a world of bliss.

- I. **There is great similarity between trees and good men, which is:**
 - a) both do good to others
 - b) both live long
 - c) both face hardships
 - d) both do not complain of suffering
- II. **Life itself is ⁴⁷unprofitable if man does not live for others. This statement means:**
 - a) Man should serve others
 - b) he should improve his well-being
 - c) he should give away to others whatever he has
 - d) he should do good to others when they need help.
- III. **Sandalwood, when rubbed more, gives**

 - a) solace
 - b) more scent
 - c) relief
 - d) satisfaction

IV. A noble person does not set his foot in :

- a) other's shoes
- b) wet land
- c) slush
- d) the wrong path

V. 'Endure' can be replaced with _____

- a) beat
- b) assure
- c) last long
- d) care

4. Read the following passage carefully and answer the question the follow:

That science has become one of the most powerful factors in modern life is a generally accepted and indeed obvious fact. The proper role of the scientist himself is, however, a point on which there is no general agreement. On the one hand are those diehards who, ignoring the changed circumstances of the outside world, contend that outside the laboratory, the personal influence of the scientist should be no more than that of any other citizen. On the other hand are extremists who advocate a state verging on a technocracy in which scientists would have special privileges and a large measure of control. Those who tend towards the latter view are much more vociferous than their conservative and much more numerous

colleagues, with unfortunate result that there is a widespread impression that scientists generally share these views and wish to claim a far larger share in the control of the world affairs than they possess at present. It is therefore, time to attempt an assessment of the proper status of the scientist in modern society.

Questions:

- a) What is the present position of science and that of a scientist in society?
- b) Is there any common view about the role of a scientist in modern society?
- c) What is the argument advanced by the conservatives?
- d) How do the extremists contradict the conservatives?
- e) What is the need of the hour?
